

SOOTHER PLUS[®]

TOPICAL CREAM

A nontoxic topical antimicrobial cream

BENEFITS

- For presumed allergic, bacterial, viral, fungal and/or yeast dermatological conditions, treatment has reportedly returned the skin to its clinically normal homeostasis.
- Animals exhibiting evidence of pruritis, inflammation and discomfort are clinically reported to experience relief and return to normal condition.
- Is safe for all animal species (both exotic and domestic), such as dogs, cats, horses, rabbits, birds and reptiles.
- Nontoxic if ingested.
- Does not contain steroids or antibiotics and is in a water-soluble base.
- No reported side effects or allergic reactions.
- May be used on animals with skin disorders, such as abscesses and other infected lesions, dermatitis, wounds, burns, lick granulomas, blood feathers, bumblefoot, self-mutilation lesions and rectal prolapse.
- May be applied directly to open wounds.
- Uses transdermal technology for efficacy of topical application.

DIRECTIONS

- Apply a thin layer topically and gently massage into the affected area for 11 seconds until absorbed.
- Several treatments per day may be necessary to manage discomfort and/or pain.
- Rinse affected area with warm water every 7-10 days to avoid buildup.
- Discontinue use if irritation occurs.
- Do not use in or around the eyes.
- Do not use with other topical or occlusive products.
- For best results use in conjunction with HEALx Booster.[®]
